

Job Title

Scientific Affairs Manager Essential Milks

Location

Hoofddorp, the Netherlands

Job Description

As our Scientific Affairs Manager Essential Milks, your key responsibilities are the following:

- Build and maintain relationships as well as share information with internal and external stakeholders to:
 - shape the field of essential milks
 - generate and facilitate the development of medical education on Essential milks
- Develop and lead (if applicable) a medical affairs network and amongst others identifying, interpreting and sharing key clinical data with countries using available tools
- Drive and lead the organization and implementation of KOL and HCP events and meetings (symposia, Advisory Boards, HCP Study days, etc.) in the area of essential milks
- Maintain high level of knowledge on essential milks, and relevant aspects of medical nutrition, science and the health care environment
- Address local country questions as well as product information in the area essential milks
- Support the development of post-marketing surveys, observational studies, etc. in close collaboration with internal stakeholders from other departments (marketing, research, sales, etc.)
- Map opinion leaders and other key stakeholders (e.g. payers, policy makers) in the area of essential milks
- Develop rationales, dossiers and communication materials (including sales training materials) to support product positioning, messaging and reimbursement
- Create and deliver presentations both internally and externally on the scientific basis of our products in the area of essential milks

About You

To be able to achieve the above, you have a **Master degree or PhD in Life Science** (Nutrition, dietetics biology, physiology...) and at least 5 years of relevant experience in a commercial environment (health care, food, science or pharmaceutical industry).

If you are our ideal candidate, you also need the following:

- Strong business acumen and understanding of future trends in multi-HCP environment (e.g. literature, competition, congresses, etc.)

- Experience in KOL engagement and in translating scientific information to different audiences
- Excellent communication skills with the ability to easily interact with people (both internally and externally)
- A proactive and can-do attitude
- Agility to be able to deal with several projects at the same time while keeping the right focus
- Fluency in business English and Chinese, written and oral

About Us

Our company's mission is bringing health through food to as many people as possible and we want to invite people to join the movement for a healthier world. We recognize the power people have to impact the world through their daily choices. Healthy food needs a healthy planet, and this is what our new signature embodies.

We Offer

We offer a complete package of benefits, with a good primary salary and yearly bonus, but also benefits like a premium free pension, 30 days annual leave, discounts on a collective health insurance and our company products.

This vacancy is published on 21st January 2020.
