Job Category:

Finance, Banking

Position:

Senior Business Analyst

Location:

Amsterdam, the Netherlands

Imagine……

that your analyses and designs ensure flawless IT fulfilment of the Risk & Finance business initiatives and requirements. As Senior Business Analyst you can make a difference by giving the right directions for development and continuous improvement of Regulatory Reporting > Credit Risk IT applications.

Making a difference

- You translate business requirements and issues into high level analyses and designs that are in line with the chosen business and IT architectures,

- You are a sparring partner for business management, development teams, product owners and other stakeholders.

- You play a key central role in monitoring the quality of work delivered by pre-ready and ready Business Analysts in the development teams,

- You are and remain abreast of the latest market and technological developments and incorporate these in the execution of your business analysis work.

With each other

Collaboration is at the heart of everything we do. Reporting IT is positioned within the Risk & Finance IT domain, responsible for our bank's backbone IT systems for the Risk and Finance business functions. Within that domain is Reporting IT responsible for the run and change processes of our internal, external and regulatory reporting applications. The Reporting Landscape is transforming from a wide variety of on premise tooling towards more and more standardized components in the Cloud.

Our Reporting team brings talented people together to continuously improve the efficiency and effectiveness of her IT projects. In your role as Senior Business Analyst you will have your home within Regulatory Reporting and more specific the Credit Risk calculations and reporting Team. You will actively work with the Business stakeholders, other delivery teams and other internal and external stakeholders. With you as a Senior Business Analyst, the team will consist of 10+ diverse colleagues in a variety of roles, including: business analysts, developers, and operations engineers.

With you

Customer focus, innovative thinking, change execution power and persuasiveness are clearly essential for the role of Business Analyst. In addition, it's important that you recognise everything in the checklist below:

- Educated at University level

- Minimum 8 years of experience in banking and/or financial services IT

- Experience with Credit Risk calculations and reporting

- Experience with Reporting solutions, especially Moody's Risk Authority is desirable

- Some technical abilities e.g. basic SQL/database skills (especially in Oracle)

- Experience with business analysis methodologies and applicable IT architectures;

- Experienced in stakeholder management;

- Excellent oral and written communication skills in English (mandatory) and Dutch (Preferable)

- Not shy of a very complex environment. Furthermore you: show initiative, are analytically strong, have a good drive, result oriented, can be persistent and you communicate clear in the style fit to the situation.

- Experience in agile environment, experience with DevOps, SCRUM and LEAN

Growing a better world together

You'll already be aware that our bank is a financial services provider for 7.1 million customers in 40 countries. But did you know that we aim to contribute to real change with our 'Growing a better world together' mission? We do so in countless ways, such as:

- Yearly we invest heavily in the Dutch voluntary sector. We support 1250 organisations for sports and culture, which are a second home for many people.

- In a project with Humanitas we help people with financial problems, struggling to organise their home finances.

- Together with Refugee Work Netherlands we help 1.500 refugees to find a suitable job.
